UMF

PERFORMANCE WHEN IT COUNTS

DESIGNED TO KEEP YOU MOVING

Deltec's UMF batteries are designed to excel in vehicles that require reliable and high-performance battery power. Produced in a state-of-the-art manufacturing facility using patented X-Frame technology and high-grade components, Deltec batteries deliver superior cranking power and micro-cycling capability. Known for their quality and reliability, Deltec batteries are built to meet the demanding requirements of modern vehicles.

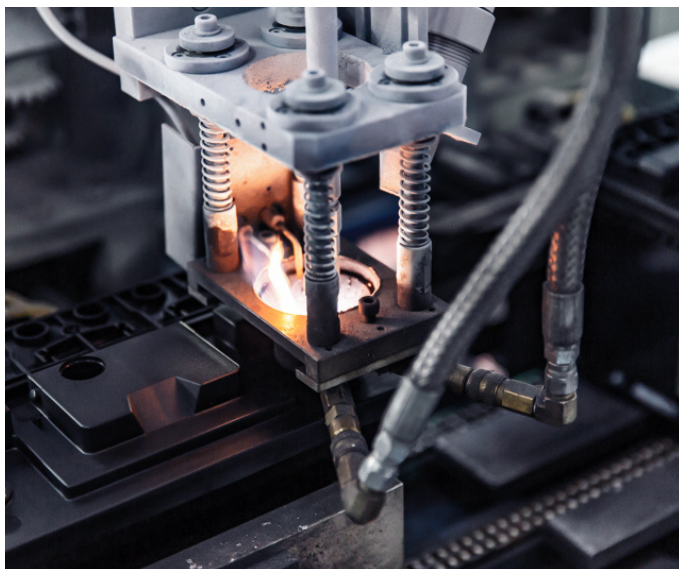

PROVEN PERFORMANCE

Deltec's series of UMF batteries are the preferred choice for modern vehicles. These batteries are specifically designed to meet or exceed the demands of high-end vehicles that feature advanced electronic devices and accessories.

Benefits

- Up to 30% Enhanced Starting Power
- Quick charge/Smart Care technology
- Long service life
- Maintenance free design to withstand the harshest Australian conditons

Features

The latest in full-framed stamped grid technology, Deltec's patented **X-Frame** design provides increased active material and grid surface area for stable and powerful starting performance.

- With **High Durability Plate Technology**, micro-fibre is added to increase the durability of active mass, supplying stable and prolonged power supply.
- **Calcium+** - a highly pure, advanced lead-calcium-tin alloy technology features excellent prevention against corrosion, self-discharge, and electrolyte loss.
- Experience superior battery performance with our advanced technology featuring **Premium Pb (99.9%)** and Advanced Ca/Ca alloy.
- **Quick Charge Tech**, optimised electrolyte composition which further ehances charge acceptance, coupled with X-Frame technology reduces electrical resistance and reduces time to charge.
