BATTERIES

**INDUSTRIAL  
BATTERIES**

# DELTEC INDUSTRIAL BATTERIES

## Flooded

Durable, high performance maintainable batteries to provide reliable power at a cost-effective price. Made in the USA.

## Lead Carbon

Excellent charge acceptance and optimized to perform in partial state of charge condition. No water maintenance, high cycle life.

## Gel

Reliable, long-lasting energy for demanding industrial and commercial applications, built for durability, efficiency, and performance.

## APPLICATIONS

Golf Cart

Cleaning  
Machine

Forklift

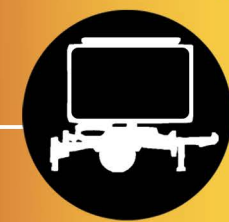

Boat

Solar  
Panel

EWP

Lighting  
Board

# FLOODED

**DELTEC Flooded Batteries are engineered with cutting-edge technologies, premium components, and advanced manufacturing processes. Our products are built to deliver exceptional reliability, durability, and performance; ensuring long-lasting value and consistent results in demanding environments.**

## BENEFITS

**Unmatched Reliability:** Engineered to deliver consistent performance over time

**Exceptional Durability:** Built with premium materials and advanced processes to withstand demanding conditions

**Superior Performance:** Optimized for efficiency and high output

**Quality Assurance:** Manufactured in ISO 9001: 2008 certified facilities to meet international standards

**Trusted Testing Standards:** Tested according to BCI and IEC 61427: 2005-05 for quality and reliability

**Proudly Made in the USA**

## FEATURES

**Advanced Technologies:** Incorporating the latest innovations for superior functionality

**Premium Components:** Built with high-quality materials to maximize lifespan and efficiency

**State-of-the-Art Processes:**

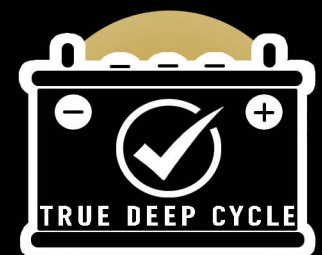

Casted plates for enhanced durability

Computer-controlled curing for consistency in plate quality

Automated Cast-on-strap (COS) for precise assembly

Automated heat-seal process for robust connections

Computer-controlled formation for optimized battery performance

# *Built for Durability and Performance:* **DELTEC Flooded Batteries**

DELTEC Flooded Batteries combine advanced technology with premium components to deliver exceptional *reliability, durability, and performance*.

Designed for demanding environments, they provide long-lasting value and consistent power. With rugged flooded battery technology, you get the *durability and outstanding performance* needed to keep moving—while keeping costs low.

# LEAD CARBON

DELTEC Lead Carbon batteries are expertly engineered for outstanding performance in moderate to heavy cyclic applications. Designed to excel in demanding high current cycles, these fully sealed, vibration-resistant batteries meet Australian and New Zealand safety standards and deliver reliable power even in rugged conditions.

## BENEFITS

- High Cyclic Life:** Delivers long-lasting performance over numerous charge/discharge cycles
- Improved Partial State-of-Charge (PSoC) Performance:** Optimized for consistent operation under partial charge conditions
- Low Maintenance:** Requires no watering, making it convenient and cost-effective
- Reduced Sulphation:** Minimized risk of performance loss over time
- Excellent Charge Acceptance:** Ensures efficient energy input during charging cycles
- Wide Temperature Tolerance:** Performs reliably in extreme conditions, from -30°C to +60°C

## FEATURES

- Lead-Carbon Composite Negative Plate:** Combines capacitance with battery properties for superior efficiency and longevity
- Extended Lifespan:** Excels in deep discharge scenarios, providing outstanding durability
- Exceptional Charge Absorption:** Rapidly accepts and stores energy, optimizing performance
- High Current Discharge Capacity:** Supports instantaneous high-current discharges for demanding applications
- Reliable in All Conditions:** Robust performance across both high and low-temperature environments
- Advanced Sealing Technology:** Ensures precision and durability, enhancing overall reliability

# Unmatched Performance and Reliability: DELTEC Lead Carbon Batteries

DELTEC Lead Carbon AGM Series is the ultimate power solution for all industrial applications. Engineered to **excel in demanding environments**, these batteries are designed to meet and exceed the rigorous needs of advanced machinery and cutting-edge electronic systems.

Whether your application requires robust energy support or enhanced reliability, the DELTEC Lead Carbon AGM Series delivers exceptional performance and unmatched dependability you can **trust**.

# GEL

**DELTEC high-cyclic industrial batteries are advanced gel deep-cycle batteries designed for industrial and commercial applications that require frequent charging and discharging cycles. They are built to provide reliable, long-lasting energy in demanding environments, with a focus on durability, efficiency, and performance.**

## BENEFITS

**Maintenance Free Operation:** No need to refill with water during the battery's lifetime

**Reliable:** Strong industrial design with low self-discharge and leak-proof construction

**Temp Tolerance:** Can withstand extreme operating conditions due to reduced plate corrosion and the sealed design

**Enhanced Deep Cycle Performance:** Excel in deep-cycle applications, providing consistent power over long periods

**Safe:** High intrinsic safety and non-hazardous

**Environmentally Friendly:** Produce minimal gas emissions during operation and are recyclable, reducing their environmental footprint

**Vibration and Shock Resistance:** Robust construction allows them to withstand vibrations and shocks, making them ideal for industrial applications

## FEATURES

**Sealed Design:** Valve-regulated design ensures no electrolyte leakage or spillage

**Gelled Electrolyte:** The electrolyte is suspended in a silica-based gel, providing better efficiency and stability

**Durable Build:** Rugged casing materials protect against physical damage and harsh environmental conditions

**Deep Discharge Recovery:** Designed to recover from deep discharges

**Efficient Charge Acceptance:** Addition of carbon optimizes to accept and store charge efficiently, even at lower voltage inputs

**Compact and Flexible Installation:** Can be installed in various orientations due to their non-liquid electrolyte

**Higher Discharge Efficiency:** Will deliver a consistent voltage output, even at higher discharge rates

# Power That Lasts: DELTEC High-Cyclic Gel Batteries

Engineered for endurance, DELTEC's high-cyclic gel batteries deliver unmatched reliability, maintenance-free operation, and long-lasting performance, making them the **ultimate energy solution** for industrial and commercial demands.

Their sealed, leak-proof design enhances durability, while optimized charge acceptance and deep discharge recovery ensure consistent power. Built to withstand harsh conditions, DELTEC batteries provide dependable, high-performance energy for a wide range of applications.

# **ABOUT DELTEC BATTERIES**

DELTEC Batteries don't just offer the very best Industrial Battery solution, we also provide cutting-edge solutions with the latest advanced technology across our automotive performance range and premium lithium in our leisure range. Designed to endure tough Australian and New Zealand conditions, our batteries provide reliable power for every application.

Committed to quality, we rigorously test all products and work with leading manufacturers to ensure exceptional durability and value. DELTEC Batteries offer the peace of mind you need for ultimate reliability.

## **ALWAYS HERE FOR YOU**

DELTEC Batteries are built to support you, and so are we. For technical assistance or warranty inquiries, our knowledgeable and friendly team is just a call or message away.
